Governance Maturity Assessment of Telecom Egypt (WE)

Evaluating Governance Practices and Digital Transformation Readiness in One of Egypt's Leading Telecommunications Companies

This report presents a governance maturity assessment of Telecom Egypt (WE), focusing on governance effectiveness, risk management, and digital transformation readiness. Through analytical evaluation, the organization achieved strong governance performance with opportunities for further enhancement in participation and governance analytics. The report concludes with strategic recommendations to support long-term sustainability and institutional excellence.

Industry: Telecommunications & Digital Infrastructure

Brand: WE

Employees: ~53,000+

Governance Score: 82%

Assessment Level: Good

Introduction

This report evaluates the governance maturity of Telecom Egypt (WE), focusing on governance effectiveness, risk management, and digital transformation readiness. Through analytical evaluation, the organization achieved strong governance performance with opportunities for further enhancement in participation and governance analytics. Strategic recommendations are proposed to support long-term sustainability and institutional excellence.

Project Objectives

The main objective of this project is to assess the governance framework of Telecom Egypt by analyzing its governance principles, organizational structure, stakeholder relationships, and strategic risks. The study also examines how digital transformation contributes to improving operational efficiency, transparency, and sustainable growth.

Assessment Methodology

The assessment methodology is based on a multi-dimensional framework that includes organizational analysis, SWOT analysis, stakeholder mapping, governance scoring, and risk assessment. Quantitative visualization tools such as MATLAB-generated graphs and analytical dashboards were used to enhance data interpretation and decision-making.

Report Scope

This report focuses on evaluating Telecom Egypt's governance maturity by assessing organizational structure, governance principles, stakeholder engagement, risk exposure, and digital transformation readiness. The scope also includes strategic recommendations for improving governance effectiveness and long-term institutional sustainability.

Telecom Egypt (WE) Telecommunications, Digital Infrastructure, Internet Services, Cloud Solutions.

Telecom Egypt (WE) is a leading telecommunications and digital infrastructure company that serves as a cornerstone of Egypt's digital economy. Since its establishment in 1854, the company has evolved from a traditional telecom provider into a strategic digital enabler delivering integrated communication, internet, cloud, and infrastructure services. Through continuous investment in innovation, governance, and digital transformation, Telecom Egypt contributes significantly to national connectivity, economic growth, and long-term sustainable development.

- ## Vision
  To become the leading digital enabler in Egypt and the region.
- ## Mission
  Provide reliable digital communication services with operational excellence and sustainable growth.
- ## Core Values
  Integrity
  Innovation
  Accountability
  Transparency
  Customer Focus
  Strategic Goals
  Expand fiber infrastructure
  Improve digital services
  Increase profitability
  Enhance governance
  Support national digital transformation

- **Organizational Structure**

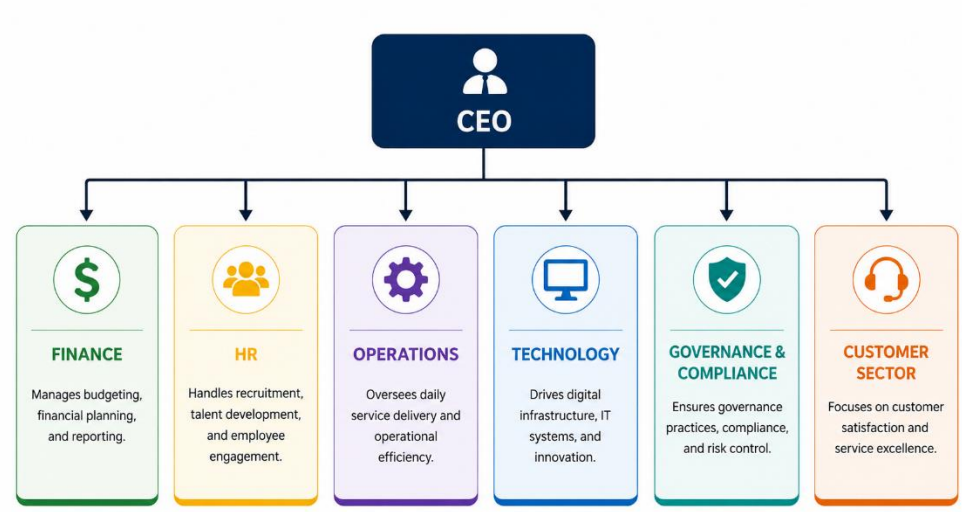

Figure1: illustrates Telecom Egypt's organizational hierarchy, showing the distribution of executive responsibilities and governance oversight across key business functions.

- **Company Growth**

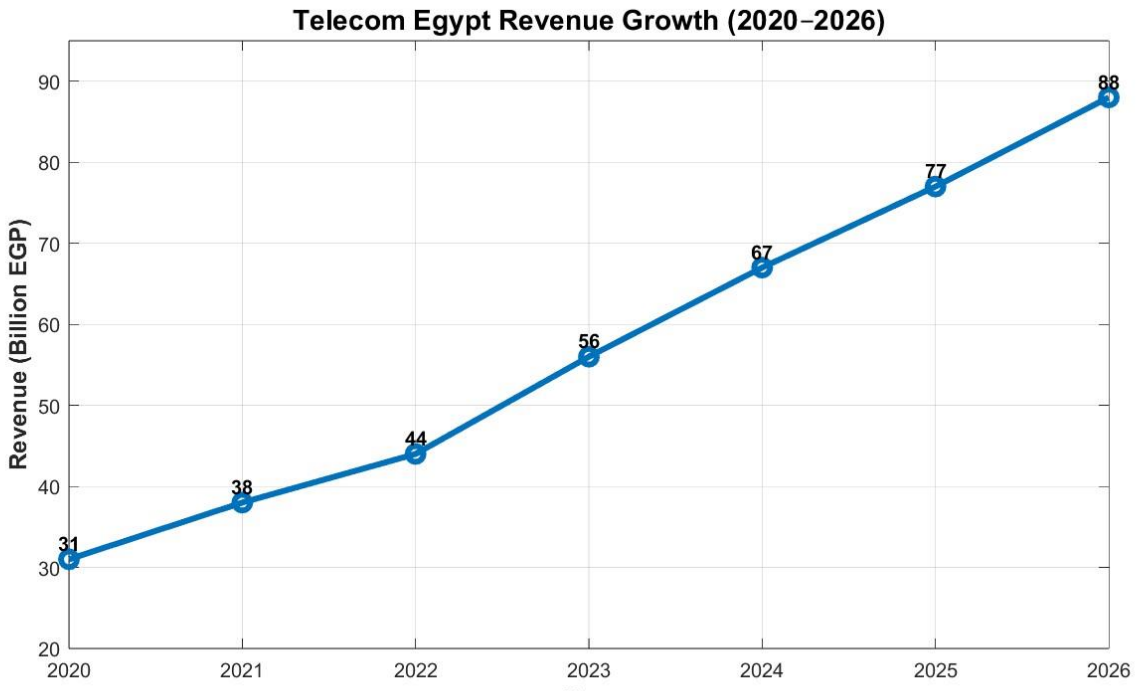

Figure 2:presents Telecom Egypt's revenue growth from 2020 to 2026, highlighting strong financial expansion driven by digital transformation and infrastructure investments.

Figure Explanation

The graph illustrates a strong and consistent upward growth in Telecom Egypt's revenue between 2020 and 2026. Revenue increased from 31 billion EGP in 2020 to an estimated 88 billion EGP in 2026, representing approximately 184% growth. This reflects the company's successful digital transformation strategy, expansion of fiber infrastructure, increasing demand for internet services, and stronger market competitiveness.

SWOT Analysis

The SWOT analysis indicates that Telecom Egypt possesses strong infrastructure capabilities and strategic market positioning. However, bureaucratic decision-making and legacy systems may limit agility. Emerging opportunities in AI, cloud computing, and 5G expansion can accelerate growth, while cybersecurity threats and regulatory changes remain critical external risks.

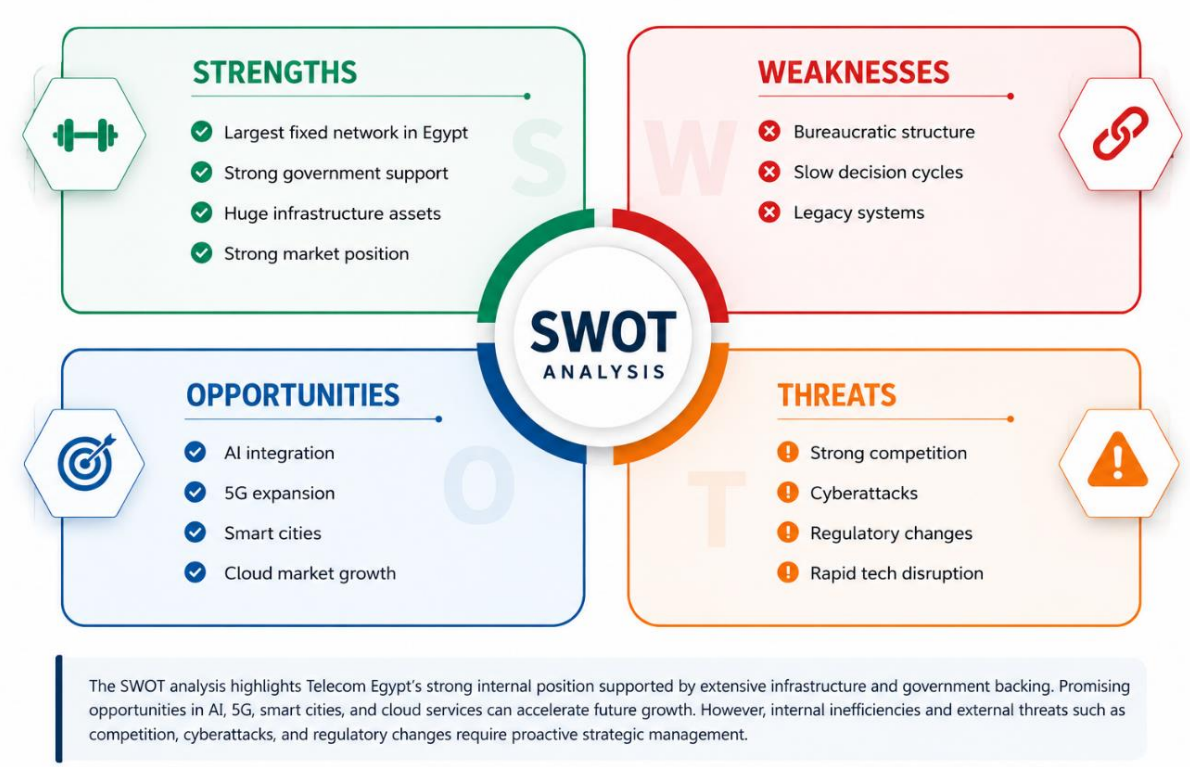

Figure 3: summarizes Telecom Egypt's strategic strengths, weaknesses, opportunities, and threats affecting long-term competitiveness and governance performance.

Stakeholder Analysis

Internal Stakeholders

- Employees
- Board of Directors
- Management

External Stakeholders

- Government
- Customers
- Investors
- Suppliers, Regulators

Stakeholder Matrix

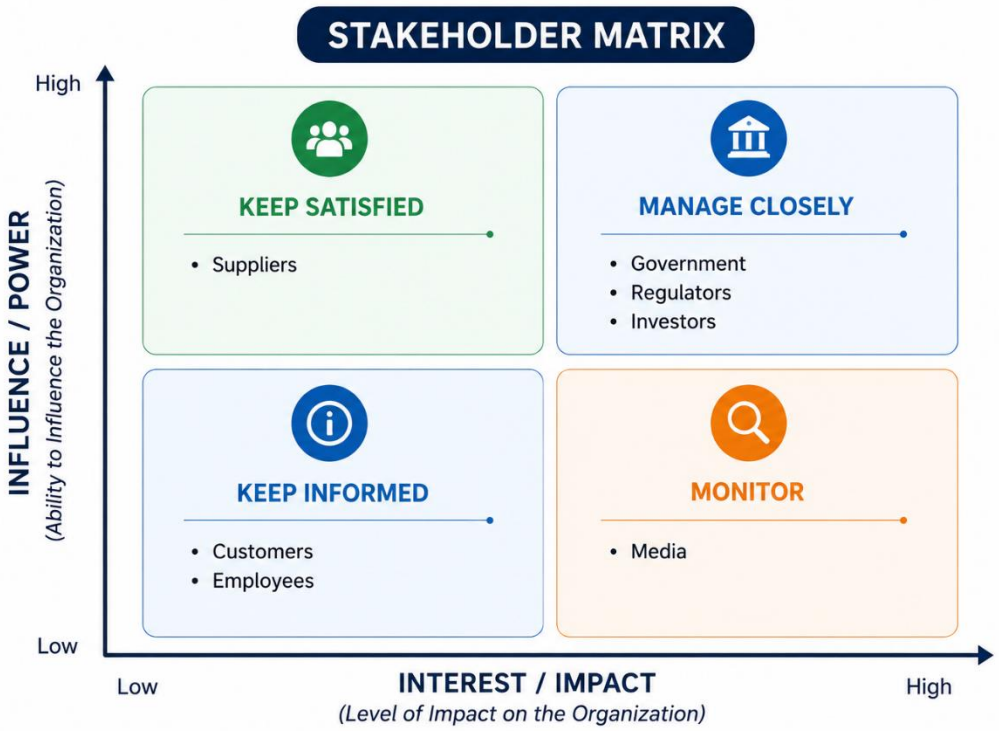

Figure 4:maps key stakeholders according to their level of influence and interest, supporting effective engagement and governance prioritization.

Stakeholder Analysis:

The stakeholder matrix illustrates Telecom Egypt's key stakeholders based on their level of power/influence and interest in the organization.

- **Manage Closely (High Power – High Interest):**
  Government, regulators, and investors are placed in this quadrant because they significantly influence strategic decisions, governance policies, compliance requirements, and long-term investments. Maintaining strong engagement with these stakeholders is critical for organizational stability.
- **Keep Satisfied (High Power – Low Interest):**
  Suppliers have considerable influence on operational continuity and service delivery but are generally less involved in daily strategic decisions. Telecom Egypt should maintain reliable partnerships and contractual transparency.
- **Keep Informed (Low Power – High Interest):**
  Customers and employees are highly affected by Telecom Egypt's performance and transformation initiatives. Continuous communication, feedback mechanisms, and service transparency are essential to maintain trust and satisfaction.
- **Monitor (Low Power – Low Interest):**
  Media is classified in this category as it has limited direct control over operations but still requires monitoring due to its potential impact on public perception and corporate reputation.

Governance Principles Assessment

Transparency — 4/5

- Annual reports and financial statements are publicly disclosed.
- Investor relations reports provide regular business updates.
- Financial performance data is accessible to shareholders and regulators.
- Strategic initiatives and major announcements are communicated publicly.
- Some internal governance procedures remain less visible to external stakeholders.

Reason for Score:

Telecom Egypt maintains strong transparency through regular disclosures and reporting; however, limited visibility into internal governance processes prevents a perfect score of 5/5.

Governance Principle	Score /5
Transparency	4
Fairness	4
Accountability	5
Responsibility	4
Participation	3
Independence	4
Compliance	5
Risk Management	4
Anti-Corruption	4

Fairness — 4/5

- Stakeholder rights are generally respected across business operations.
- Fair contractual relationships with suppliers and partners are maintained.
- Customers receive regulated service standards and support mechanisms.
- Employee policies aim to ensure equitable treatment and workplace standards.
- Government ownership may occasionally raise concerns about balanced influence.

Reason for Score:

Telecom Egypt demonstrates good fairness in stakeholder treatment, though ownership structure may create potential concerns regarding equal influence among all stakeholder groups.

Accountability — 5/5

- Clear reporting lines exist across all departments.
- Strong executive oversight ensures performance monitoring.
- Internal audit functions strengthen accountability mechanisms.
- Decision-making responsibilities are clearly assigned.
- Performance evaluation supports continuous improvement.

Reason for Score:

Telecom Egypt demonstrates excellent accountability through strong oversight, clear responsibilities, and effective internal control systems, justifying a full score of 5/5.

Responsibility — 4/5

- Departments have clearly defined operational responsibilities.
- Strategic responsibilities are aligned with corporate objectives.
- Strong commitment to service delivery and infrastructure reliability.
- The company contributes to Egypt's digital transformation agenda.
- CSR and sustainability efforts support social responsibility.

Reason for Score:

Telecom Egypt shows strong organizational responsibility and commitment to national development, though further ESG integration could improve maturity.

Participation — 3/5

- Customers can provide feedback through service channels.
- Investors participate via annual meetings and disclosures.
- Employee engagement mechanisms exist but remain limited.
- Strategic decisions are largely top-down.
- Broader stakeholder involvement in governance is moderate.

Reason for Score:

Stakeholder participation exists but remains limited in strategic decision-making, making this the weakest governance dimension and justifying a score of 3/5.

Independence — 4/5

- Governance oversight functions support objective monitoring.
- Internal audit committees enhance decision neutrality.
- Compliance teams reduce conflicts of interest.
- Oversight mechanisms improve control effectiveness.
- Government influence may limit full institutional independence.

Reason for Score:

Telecom Egypt demonstrates good governance independence, but ownership concentration may reduce complete independence in certain strategic decisions.

Compliance — 5/5

- Strong compliance with telecommunications regulations.
- Adherence to financial reporting standards.
- Compliance with labor and employment laws.
- Cybersecurity regulations are actively monitored.
- Regulatory obligations are consistently fulfilled.

Reason for Score:

Telecom Egypt operates under strict regulatory requirements and demonstrates excellent legal and regulatory compliance, warranting a full score of 5/5.

Risk Management — 4/5

- Exposure to significant cybersecurity risks due to digital expansion.
- Operational risks related to service disruption and outages.
- Infrastructure failures may impact service continuity.
- Strong market competition increases strategic pressure.
- Governance and compliance functions support risk mitigation.

Reason for Score:

Telecom Egypt demonstrates strong risk management practices and structured control mechanisms; however, rapidly evolving cyber threats and technological disruptions prevent a perfect score of 5/5.

Anti-Corruption — 4/5

- Internal control systems reduce fraud risks.
- Audit procedures strengthen monitoring and oversight.
- Compliance policies discourage unethical practices.
- Governance mechanisms promote ethical behavior.
- Ethics awareness programs can be further strengthened.

Reason for Score:

Telecom Egypt maintains strong anti-corruption controls and internal monitoring systems, although further enhancement in ethics training and whistleblowing mechanisms could improve governance maturity.

The governance scores were derived using a qualitative maturity assessment model based on public disclosures, governance structures, regulatory compliance, annual reports, and organizational practices. Each principle was evaluated on a 1–5 scale representing governance maturity.

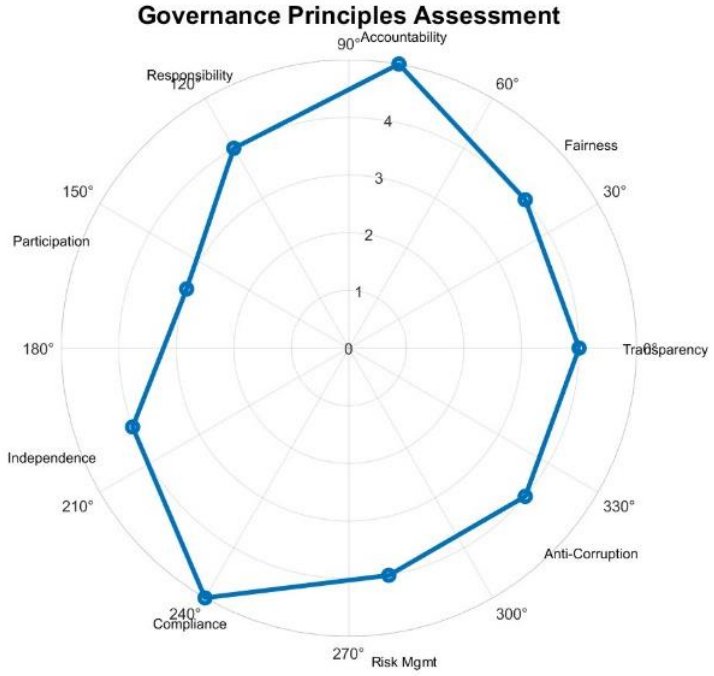

Figure 5:visualizes Telecom Egypt's governance maturity across nine governance principles, identifying strong performance areas and improvement opportunities.

Radar Chart Analysis:

The radar chart visually represents Telecom Egypt's governance maturity across nine governance principles. The organization demonstrates strong performance in **accountability** and **compliance**, both achieving the highest score of 5/5, reflecting robust oversight and regulatory adherence. Most governance dimensions scored 4/5, indicating good overall governance practices. However, **stakeholder participation** scored 3/5, highlighting it as the primary area requiring further improvement. Overall, the chart indicates a balanced and mature governance framework with opportunities for enhanced stakeholder engagement.

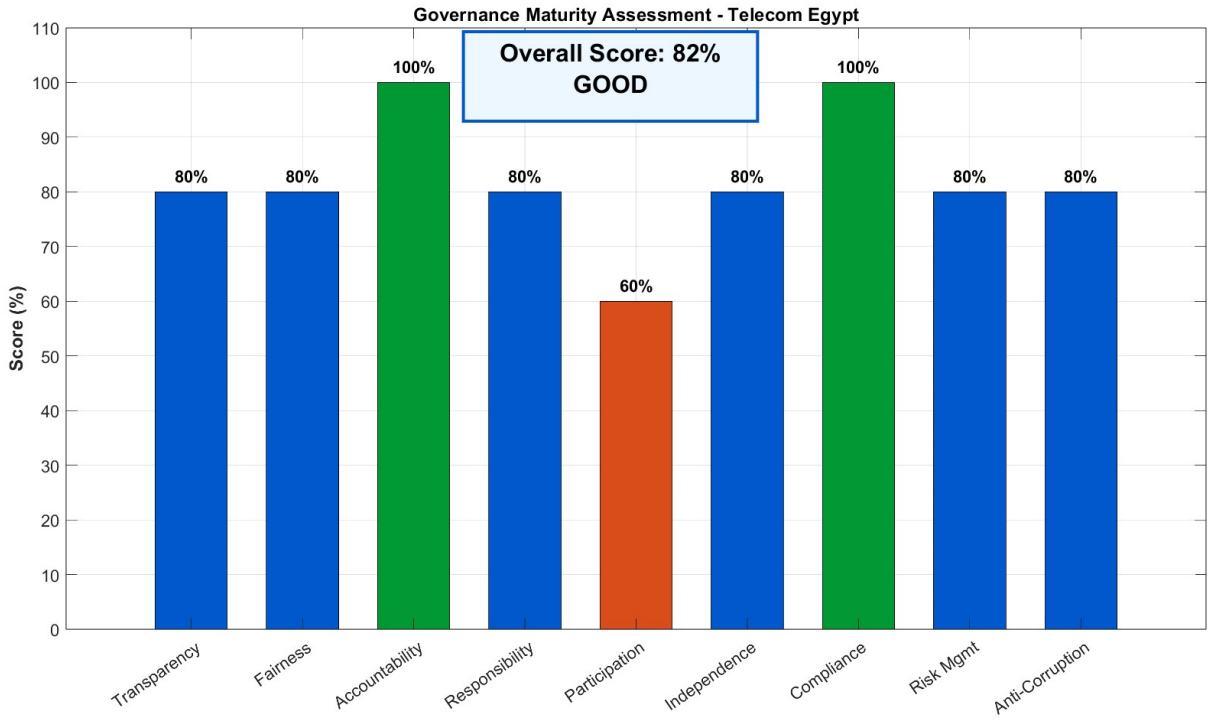

Figure 6: presents the quantitative governance maturity assessment generated using MATLAB, showing individual governance scores and overall maturity level.

Figure Explanation

Telecom Egypt exhibits a **high level of governance maturity**, supported by strong institutional oversight, regulatory compliance, and risk management practices. The overall assessment score of **82%** places the organization within the **Good Governance** category, with further opportunities to enhance stakeholder participation and governance transparency.

SCORE INTERPRETATION

- **90–100%** — Excellent Governance Maturity
- **75–89%** — Good Governance Maturity
- **50–74%** — Moderate Governance Maturity
- **0–49%** — Needs Improvement

Total Score= 37 / 45

82.2%

GOOD Governance Maturity.

Reasons: **Strong accountability, Good risk management, Moderate participation, Strong compliance**

Governance Maturity
Final Evaluation

Telecom Egypt demonstrates a strong governance maturity level with an overall score of 82%. The organization performs particularly well in accountability and compliance, while stakeholder participation remains the primary area requiring improvement.

Risk Matrix

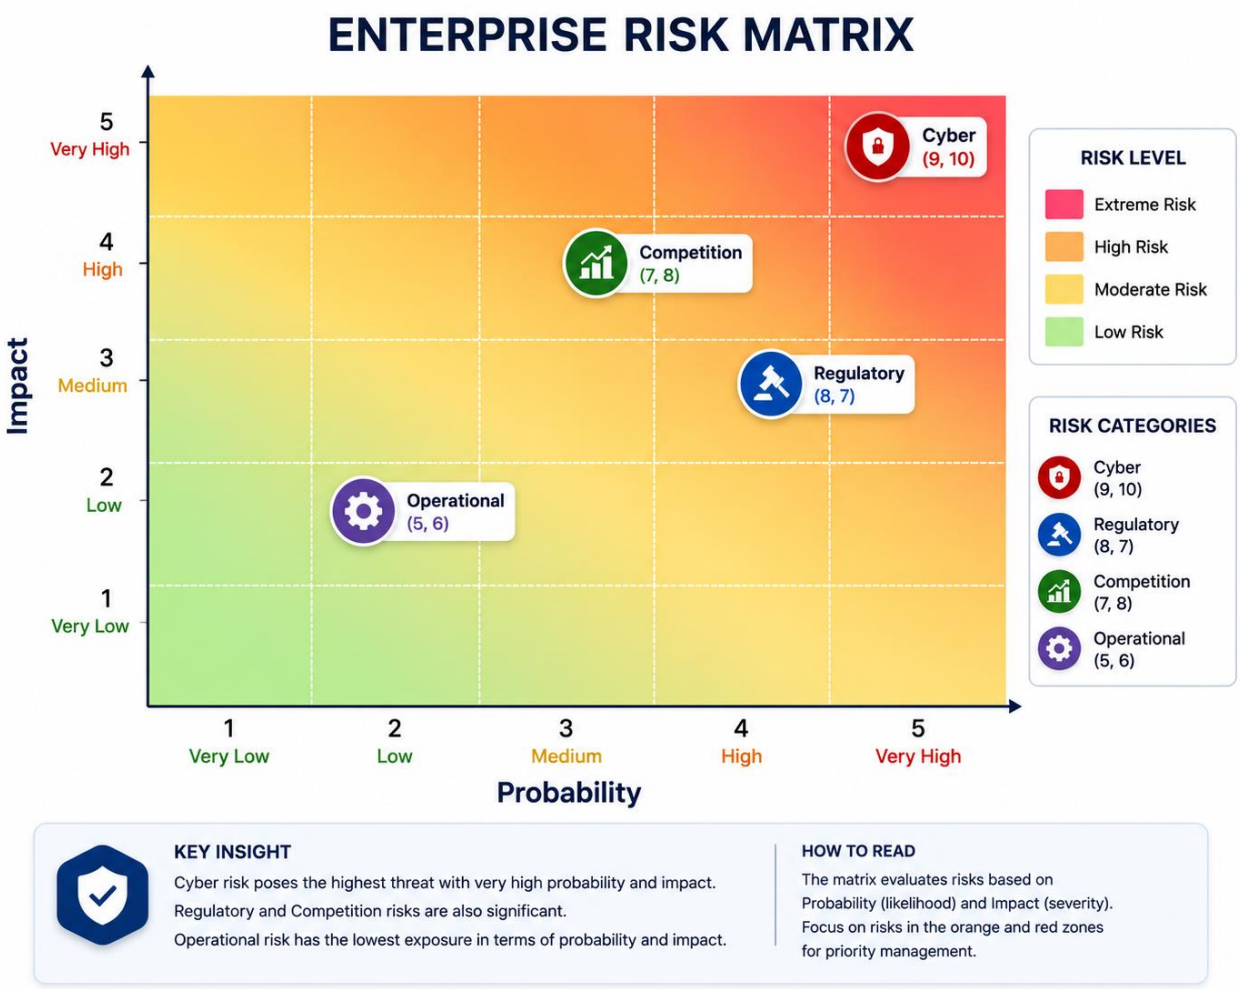

Figure 7: categorizes major enterprise risks based on probability and impact, highlighting cyberattacks as the highest-priority strategic risk.

Figure Explanation

The risk matrix identifies cyberattacks as the highest-priority risk due to both high probability and severe operational impact. Regulatory changes and market competition represent medium-to-high strategic risks, while operational failures remain manageable through proactive infrastructure maintenance and governance controls.

Risk	Probability	Impact
Cyberattack	9	10
Regulation	8	7
Competition	7	8
Operational Failure	5	6

Recommendations

Figure 8Figure 8 outlines strategic recommendations prioritized according to implementation urgency and expected organizational impact.

Priority Table

Recommendation	Priority	Impact
AI Dashboard	High	High
Stakeholder Engagement	Medium	High
Compliance Automation	High	High
Cybersecurity	Critical	Very High
ESG Reporting	Medium	High

ESG & Sustainability Governance

Environmental

- FTTH reduces energy inefficiency
- Lower emissions
- Carbon reduction support

Social

- Community engagement
- Employee safety
- Stakeholder inclusion

Governance

- Compliance systems
- Risk monitoring
- Ethical oversight

Case Study (Fiber to the Home (FTTH))

Project Objective

Expand nationwide fiber-optic infrastructure.

Strategic Impact

Supports Digital Egypt Vision 2030.

Governance Value

Ensures responsible execution through ESMS.

Sustainability Impact

- Better connectivity
- Reduced emissions ,Digital inclusion

Executive Summary

This report evaluated the governance maturity of Telecom Egypt (WE) by analyzing organizational structure, stakeholder relationships, governance principles, and risk management practices.

The assessment indicates that Telecom Egypt demonstrates strong governance maturity with an overall score of 82%, reflecting robust compliance, accountability, and institutional oversight.

Despite these strengths, opportunities remain in stakeholder engagement, digital governance integration, and cybersecurity resilience. Strategic recommendations were proposed to further enhance long-term sustainability and governance excellence.

Conclusion

Telecom Egypt demonstrates a well-established governance framework supported by strong regulatory compliance, strategic oversight, and digital transformation initiatives. While the organization performs strongly in most governance dimensions, continued investment in stakeholder participation, cybersecurity governance, and ESG reporting will be essential for achieving governance excellence and long-term sustainability.
